Mid-Year Update Date: September 2024 for May 2024

Updated by: Debbie Hanson

Supporting Pupils with Medical Needs Policy

Policy Statement

The Children and Families Act 2014 places a duty on governing bodies to make arrangements for supporting pupils at their school with medical needs.

Legislation and guidance:

DfE Supporting Pupils at School with Medical Conditions (April 2014).

This is based on advice from the Department for Education on [first aid in schools](#) and [health and safety in schools](#), and guidance from the Health and Safety Executive (HSE) on [incident reporting in schools](#), and the following legislation:

- [The Health and Safety \(First-Aid\) Regulations 1981](#), which state that employers must provide adequate and appropriate equipment and facilities to enable first aid to be administered to employees, and qualified first aid personnel
- [The Management of Health and Safety at Work Regulations 1992](#), which require employers to make an assessment of the risks to the health and safety of their employees
- [The Management of Health and Safety at Work Regulations 1999](#), which require employers to carry out risk assessments, make arrangements to implement necessary measures, and arrange for appropriate information and training
- [The Reporting of Injuries, Diseases and Dangerous Occurrences Regulations \(RIDDOR\) 2013](#), which state that some accidents must be reported to the Health and Safety Executive (HSE), and set out the timeframe for this and how long records of such accidents must be kept
- [Social Security \(Claims and Payments\) Regulations 1979](#), which set out rules on the retention of accident records
- [The Education \(Independent School Standards\) Regulations 2014](#), which require that suitable space is provided to cater for the medical and therapy needs of pupils
- This policy complies with our funding agreement (National Schools Contract NSC) with the Local Education Authority.

Links with other policies:

- Health and safety policy
- Risk assessment policy
- Accessibility policy, plan and audit
- Asthma Policy

Definition

Pupils' medical needs may be broadly summarised as being of two types:

- (a) Short-term affecting their participation in school activities when they are on a course of medication.
- (b) Long-term potentially limiting their access to education and requiring extra care and support (deemed special medical needs).

The DfE published guidance on supporting pupils with medical conditions which came into effect in September 2014. In paragraph 14 it states: "Schools do not have to wait for formal diagnosis before

providing support to pupils. In cases where a pupil's medical condition is unclear, or where there is a difference of opinion, judgements will be needed about what support to provide based on the available evidence. This will involve some form of medical evidence and consultation with parents."

First aid – help given to a sick or injured person until medical treatment is available.

Aims and Objectives

- Ensure that all pupils at Clarity Independent School with medical conditions, in terms of both physical and mental health, are properly supported in school and can access and enjoy the same opportunities as any other child, so that they can play a full and active role in school life, remain healthy and achieve their academic potential
- To commit to making reasonable adjustments to the development and/or adaptation of school facilities for children with medical conditions
- Ensure the health and safety of all staff, pupils and visitors
- Ensure all staff are aware of their responsibilities, with regards to health and safety
- To ensure that staff are properly trained to provide the support that pupils need
- To monitor and keep appropriate records on pupils' medical needs
- Provide a framework for responding to an incident, and recording and reporting the outcomes
- To liaise with appropriate agencies to facilitate an effective response to the needs of children with medical conditions

Roles and Responsibilities

Supporting a child with a medical condition during school hours is not the sole responsibility of one person. Our school's ability to provide effective support ensures that we work cooperatively and with other agencies. Partnership working between our school, healthcare professionals, the local authority and parents and pupils is critical. We identify collaborative working arrangements between those involved as those below, this ensures that the needs of pupils with medical conditions are met effectively.

Appointed first aiders

A risk assessment has been conducted to inform the need for appointed first aiders for the workplace. The school has three+ staff appointed first aiders for the workplace, who are trained to administer first aid to staff, to level 3. Their names and certificates will also be displayed on the first aid room door.

Debbie Hanson, Richard Clow, Sam Powell, Michelle Deveney (from 1.10.25)

All teaching staff are qualified to level 2, to administer basic first aid to pupils, and update their training annually.

The school's appointed persons are responsible for:

- Taking charge when someone is injured or becomes ill
- Ensuring there is an adequate supply of medical materials in first aid kits, and replenishing the contents of these kits, through support from the School Supporter
- Ensuring that an ambulance or other professional medical help is summoned when appropriate

First aiders are trained and qualified to carry out their role and are responsible for:

- Acting as first responders to any incidents; they will assess the situation where there is an injured or ill person, and provide immediate and appropriate treatment
- Sending pupils home to recover, where necessary
- Filling in an accident report on the same day, or as soon as is reasonably practicable, after an incident (see Appendices 4 and 5 for pupils and staff respectively.)
- Keeping their contact details up to date

Headteacher

- Ensuring that the school's policy is developed and implemented effectively with partners
- Ensuring that all staff are aware of the policy for supporting pupils with medical conditions and understand their role in its implementation
- Ensuring that all staff who need to know are aware of a child's condition
- Ensuring that appointed persons are aware of staff health needs, writing staff individual healthcare plans with staff based upon their health risk assessment
- Ensuring that sufficient trained numbers of staff and appointed persons are available in the school at all times, to implement the policy and deliver first aid detailed on individual healthcare plans, including in contingency and emergency situations
- Ensuring that all staff are aware of first aid procedures
- Ensuring appropriate risk assessments are completed and appropriate measures put in place
- Ensuring adequate space is available for catering to the medical needs of pupils
- Reporting specified incidents to the HSE when necessary
- Ensuring that first aiders have an appropriate qualification, keep training up to date and remain competent to perform their role. (This is recorded and monitored on the school's 'Accredited Training Manager' document.)
- Taking overall responsibility for the development of individual healthcare plans; staff and pupils'
- Ensuring that school staff are appropriately insured and are aware that they are insured to support pupils in this way
- Ensuring the school nursing service is contacted in the case of any child who has a medical condition that may require support at school, but who has not yet been brought to the attention of the school nurse

School Staff are Responsible for:

- Ensuring they follow first aid procedures
- Ensuring they know who the first aiders and appointed persons in school are
- Completing accident reports (see Appendices 4 and 5) for all incidents they attend to where an appointed person is not called
- Informing the headteacher or their manager of any specific health conditions or first aid needs to inform their risk assessment and IHCP if necessary

- Providing support to pupils with medical conditions, including the administering of medicines, although they cannot be required to do so
- Receiving suitable training and achieving the necessary level of competency before they take on responsibility to support children with medical conditions
- Ensuring that they know what to do and respond accordingly when they become aware that a pupil with a medical condition needs help

School Nurses where applicable (e.g. Diabetes or Asthma)

- Responsibility for notifying the school when a child has been identified as having a medical condition which will require support in school
- Supporting staff in implementing a child's individual healthcare plan and providing advice and liaison, for example on training
- Liaising with lead clinicians locally on appropriate support for the child and associated staff training needs
- Providing advice and support in relation to children with a medical condition

Other Healthcare professionals, including GPs and Paediatricians

- Responsibility for notifying the school nurse when a child has been identified as having a medical condition that will require support at school
- Providing advice on developing healthcare plans
- Providing specialist support for schools for children with particular conditions, i.e. asthma and diabetes

Pupils

- Ensuring they provide information about how their condition affects them
- Participating in discussions about their medical support needs and contributing to the development of, and comply with, their individual healthcare plan

Parents/Carers

- Providing the school with sufficient and up-to-date information about their child's medical needs and emergency contact details
- Developing and reviewing their child's individual healthcare plan with the Class teacher/Keyworker and the Head Teacher/Assistant Head Teacher
- Carrying out the action they have agreed as part of the implementation of the Individual Health Care Plan, i.e. providing medicines and equipment
- Ensuring they or another nominated adult are contactable at all times and provide up to date contact details

Local Authority

- Ensuring the promotion between relevant parties with a view to improving the well-being of children so far as relating to their physical and mental health, and their education
- Providing support, advice and guidance, including suitable training for school staff to ensure that the support specified within individual healthcare plans can be delivered effectively

- Supporting the school to support pupils with medical conditions to attend full time

Health Service Providers

- Ensuring appropriate communication, liaison with school nurses and other healthcare professionals such as specialists and children's community nurses
- Participating in outreach and training

Integrated Care Systems (ICSs)

- Ensuring that commissioning is responsive to children's needs, and that health services are able to co-operate with the school when supporting children with medical conditions
- Encouraging health services in providing support and advice

Procedures and Principles at Clarity Independent School

When pupils are diagnosed with a medical condition and this information is shared with the school, an Individual Health Care Plan (IHCP) is created (Appendix 7). This is developed with the child's best interests in mind, ensuring that the school assesses and manages risks to their education, health and social well-being and minimises disruption. Where the child has a special educational need identified in an EHC plan, the IHCP should be linked to or become part of that statement or EHC plan. The presence of an IHCP for a pupil, is noted on the pupil's individual Pupil Profile.

Procedure when notification is received that a pupil has a medical condition and process for developing Individual Health Care Plans (IHCP)

Procedure to be followed when a healthcare plan is identified to support a child's medical condition:

- The IHCP development and implementation must include input from the pupil (if appropriate) parents/carers, class teacher/keyworker, SLT, and health professional
- The IHCP must be reviewed and updated annually or as the medical condition requirements change
- A child's IHCP must be linked to a healthcare plan
- The presence of an IHCP will be noted on the child's individual Pupil Profile
- IHCPs must be stored in the pupil's e-folders on google drive, displayed in the staffroom, and locked in the medical cupboard in the first aid room for all staff to access them while protecting a child's confidentiality.
- General medical information to help support the school's medical needs will be displayed in the staffroom.
- When a child returns to school after being educated off site (i.e. hospital, home tuition or alternative provision) the school to work with LA to support reintegration back into school.

In-school procedures

In the event of an accident resulting in injury:

- The closest member of staff present will assess the seriousness of the injury and (if they are not a first aider) seek the assistance of a qualified first aider, if appropriate, who will provide the required first aid treatment
- The first aider will assess the injury and decide if further assistance is needed from a colleague or the emergency services. They will remain on the scene until help arrives.

- The first aider will also decide whether the injured person should be moved or placed in a recovery position.
- If the first aider judges that a pupil is too unwell to remain in school, they communicate with the school office who (with approval from SLT) will contact the child's parents and ask them to collect their child. Upon their arrival, the first aider will recommend next steps to the parents, including that if they have concerns they should seek healthcare advice, e.g. from the GP or call 111.
- If emergency services are called, the Senior Leadership Team (SLT) will contact parents immediately.
- The first aider will complete an accident report form on the same day or as soon as is reasonably practical after an incident resulting in an injury.
- There will be at least 1 appointed staff first aider who has a current Appointed Persons first aid certificate on the premises at all times.

Off-site procedures

When taking pupils off the school premises, staff will ensure they always have the following:

- A school mobile phone
- A portable first aid kit including, at minimum, as recommended by the HSE:
 - A leaflet giving general advice on first aid
 - 6 individually wrapped sterile adhesive dressings
 - 1 large sterile unmedicated dressing
 - 2 triangular bandages – individually wrapped and preferably sterile
 - 2 safety pins
 - Individually wrapped moist cleansing wipes
 - 2 pairs of disposable gloves
- Information about the specific medical needs of pupils
- Parents' contact details

When transporting pupils using a minibus or other large vehicle, the school will make sure the vehicle is equipped with a clearly marked first aid box containing, at minimum:

- 10 antiseptic wipes, foil packed
- 1 conforming disposable bandage (not less than 7.5cm wide)
- 2 triangular bandages
- 1 packet of 24 assorted adhesive dressings (plasters)
- 3 large sterile unmedicated ambulance dressings (not less than 15cm × 20 cm)
- 2 sterile eye pads, with attachments
- 12 assorted safety pins

- 1 pair of rustproof blunt-ended scissors

Risk assessments will be completed by class teacher, supported by the Assistant Head, prior to any educational visit that necessitates taking pupils off school premises, and in accordance with the Trip Authorisation Form.

There will always be at least 1 first aider on school trips and visits. If the trip is not to a designated activity business place with onsite first aiders, for example to a remote location, an appointed first aider for staff will also be present.

First Aid Equipment

A typical first aid kit in our school will include the following as a minimum (as recommended by the HSE):

- A leaflet giving general advice on first aid
- 20 individually wrapped sterile adhesive dressings (plasters - assorted sizes)
- 3 Small, 2 medium, 1 large adhesive wound dressings
- 2 sterile eye pads
- 2 individually wrapped triangular bandages (preferably sterile)
- 6 safety pins
- 6 medium-sized individually wrapped sterile unmedicated wound dressings
- 2 large sterile individually wrapped unmedicated wound dressings
- 3 pairs of disposable gloves

No medication is kept in first aid kits. First aid kits are stored in:

- The medical room
- The school kitchen
- Staffroom, ready to be transported in vehicles for offsite trips
- Staffroom first aid kit

Further first aid supplies are stored in the cupboards in the medical room.

Training of Staff

- All staff including new, supply, agency teachers and support staff will receive first aid training and training on the supporting pupils with medical needs school policy with their induction and to be made aware of the implementation within the school.
- All first aiders must have completed a training course, and must hold a valid certificate of competence to show this. The school will keep a register of all trained first aiders, what training they have received and when this is valid until on the school's 'Accredited Training Manager' document.
- The school will arrange for first aiders to retrain before their first aid certificates expire (annually, or every 3 years for appointed persons). In cases where a certificate expires, the school will arrange for staff to retake the full first aid course before being reinstated as a first aider.

- All staff will receive training and be competent of administering the required prescribed medication when needed to do so to support a child's medical condition.
- All training for a child's medical condition will be given by the appropriate health professional when needed to support a child in school. (i.e. School nursing team, Diabetic nurse, Epilepsy nurse)
- The school holds a central record of training received for medical conditions supported in school which is monitored regularly.
- Staff are booked on to relevant training prior to expiration or working with children that will need support with a medical condition.

Record Keeping

First aid and accident record book

- An accident form will be completed by the first aider on the same day or as soon as possible after an incident resulting in an injury.
- As much detail as possible should be supplied when reporting an accident, including all of the information included in the accident form at Appendix 4 (pupil accident form) and Appendix 5 (staff accident form).
- A copy of the accident report form will also be added to the pupil's educational record on Arbor by the first aider.
- Records held in the first aid and accident book will be retained by the school for a minimum of 3 years, in accordance with regulation 25 of the Social Security (Claims and Payments) Regulations 1979, and then securely disposed of.
- Records of use of emergency Asthma medication are made and stored on Arbor and the child's e-folder and parents are contacted each time this is used in school.

Medical Conditions register

- Parents/carers must complete a section in the school admission pack requesting information about their child's pre-existing medical condition before they start school.
- Parents/carers must contact the school to inform them of any medical condition that develops after admission to the school.
- A central medical conditions list is kept, reviewed and updated regularly by the health coordinator (Head Teacher).
- The health coordinator will inform class teachers of any updates.
- Asthma sufferers are recorded on the Asthma register, which is displayed in the staffroom and first aid room.

Reporting to the HSE

The Head Teacher will keep a record of any accident which results in a reportable injury, disease, or dangerous occurrence as defined in the RIDDOR 2013 legislation (regulations 4, 5, 6 and 7).

The Head Teacher will report these to the HSE as soon as is reasonably practicable and in any event within 10 days of the incident – except where indicated below. Fatal and major injuries and dangerous occurrences will be reported without delay (i.e. by telephone) and followed up in writing within 10 days.

School staff: reportable injuries, diseases or dangerous occurrences

These include:

- Death
- Specified injuries, which are:
 - Fractures, other than to fingers, thumbs and toes
 - Amputations
 - Any injury likely to lead to permanent loss of sight or reduction in sight
 - Any crush injury to the head or torso causing damage to the brain or internal organs
 - Serious burns (including scalding) which:
 - Covers more than 10% of the whole body's total surface area; or
 - Causes significant damage to the eyes, respiratory system or other vital organs
 - Any scalping requiring hospital treatment
 - Any loss of consciousness caused by head injury or asphyxia
 - Any other injury arising from working in an enclosed space which leads to hypothermia or heat-induced illness, or requires resuscitation or admittance to hospital for more than 24 hours
- Work-related injuries that lead to an employee being away from work or unable to perform their normal work duties for more than 7 consecutive days (not including the day of the incident). In this case, the Head Teacher will report these to the HSE as soon as reasonably practicable and in any event within 15 days of the accident
- Occupational diseases where a doctor has made a written diagnosis that the disease is linked to occupational exposure. These include:
 - Carpal tunnel syndrome
 - Severe cramp of the hand or forearm
 - Occupational dermatitis, e.g. from exposure to strong acids or alkalis, including domestic bleach
 - Hand-arm vibration syndrome
 - Occupational asthma, e.g. from wood dust
 - Tendonitis or tenosynovitis of the hand or forearm
 - Any occupational cancer
 - Any disease attributed to an occupational exposure to a biological agent
- Near-miss events that do not result in an injury, but could have done. Examples of near-miss events relevant to schools include, but are not limited to:
 - The collapse or failure of load-bearing parts of lifts and lifting equipment
 - The accidental release of a biological agent likely to cause severe human illness
 - The accidental release or escape of any substance that may cause a serious injury or damage to health
 - An electrical short circuit or overload causing a fire or explosion

Pupils and other people who are not at work (e.g. visitors): reportable injuries, diseases or dangerous occurrences

These include:

- Death of a person that arose from, or was in connection with, a work activity*
- An injury that arose from, or was in connection with, a work activity* and the person is taken directly from the scene of the accident to hospital for treatment

*An accident “arises out of” or is “connected with a work activity” if it was caused by:

- A failure in the way a work activity was organised (e.g. inadequate supervision of a field trip)
- The way equipment or substances were used (e.g. lifts, machinery, experiments etc); and/or
- The condition of the premises (e.g. poorly maintained or slippery floors)

Information on how to make a RIDDOR report is available here:

[How to make a RIDDOR report, HSE](http://www.hse.gov.uk/riddor/report.htm) <http://www.hse.gov.uk/riddor/report.htm>

Reporting to Ofsted and child protection agencies

The Head Teacher will notify Ofsted of any serious accident, illness or injury to, or death of, a pupil while in the school's care. This will happen as soon as is reasonably practicable, and no later than 14 days after the incident.

The Head Teacher will also notify the Children and Family's Safeguarding Hub of any serious accident or injury to, or the death of, a pupil while in the school's care.

The Head Teacher will also notify the Local Authority that referred the pupil to the school, of any serious accident or injury to, or the death of, a pupil while in the school's care.

Transport arrangements

- When a child with a medical condition travels to school by Local Authority transport provision, the school to liaise with the transport company to invite a driver or escort to healthcare meetings. Copy of individual healthcare plan to be sent to transport team, copy will accompany driver/escort during travel.
- Driver/escort training for medical conditions is to be considered and to be included in the specification for the child's transport tender.
- All prescribed medication to support child's medical condition in school is to be stored in a suitable container. The parent is to be responsible for handing over to driver/escort.
- During transportation, medication to be supervised by an adult and handed to a member of staff on arrival. Transport team to be advised and approve any change of this arrangement.

In the event of long-term absence due to medical needs:

- We will follow our Attendance Policy and procedure
- We will provide educational provision to pupils of compulsory school age who would normally receive full-time education that miss 15 school days or more due to illness.
- Local Authority to be informed if a pupil is absent for more than 15 days.

Prescribed Medication

- Medication will only be administered at school if it is detrimental to health not to do so. It must be prescribed and, where possible, be administered outside school hours.
- Only prescribed medication will be administered when necessary at school that has a pharmacy label displaying the pharmacist logo, clearly displays the child's name, dosage and storage requirements and is in the original packaging including information leaflet. This excludes insulin that maybe in pump or insulin pen form, which must be authorised by a letter signed by a medical professional on appropriate letterhead with clear instructions.
- The medication must be in date. It is the parent/carers responsibility to provide the school with medication prior to the expiration date.
- The parent/carer or responsible adult to hand in and collect medication from the School Office Manager (this can be passed on via the transport PA if necessary). An administration of medication consent form to be completed and signed by parent/carer (Appendices 1 and 2). All requirements must be met before medication will be administered.
- Written records to be kept of all medication administered to children (Appendix 6).
- All Emergency medication including asthma pumps and auto-injectors to be stored safely with easy access for use. Epilepsy medication will be stored in a locked cupboard in the medical room. No child is allowed to carry their own medication in school unless stated in their NHS care plan and risk assessed to be safe to do so, i.e. *severe* asthma and diabetes.
- All emergency medication must stay in school until the last day of summer term. Medication that has passed its expiry date will be returned sooner.
- Prescribed medication will be collected daily or once the course has finished.
- No child will be forced to take their medication but will be activity encouraged to do so.
- Parents/ carers will be informed of a child's decision *not* to take medication.
- No pupils will be refused access to their medication.
- The school cannot be held responsible for any side effects that may occur when medication is given correctly.

Non-Prescription Medication

- Non-prescription medication will only be administered in exceptional circumstances at the discretion of the headteacher and with a signed consent form from the parent/carer (Appendix 2).
- The child's name must be clearly displayed on the medication box.
- All original packaging including information leaflets to be included.
- The medication must display a clear expiry date.

Storage of Medicines

- All prescribed medication to be stored correctly, in the locked medicine cabinet or a fridge accessible to adults only.

Emergencies

- The school's emergency procedures must be followed in the event of a medical emergency.

- All relevant staff must be aware of signs and symptoms.
- Pupils must be informed in general terms of what to do in emergency such as telling a teacher or adult around school.
- If a pupil needs to be taken to hospital a member of staff will act in 'loco parentis' and stay with them until a parent arrives.
- The First Aid Procedure should be followed if necessary by qualified first aiders.
- All teaching staff are qualified to administer first aid to children and take refresher training annually. Certificate to confirm this are displayed on the first aid room door.
- Asthma first aid response is followed by any member of asthma response qualified teaching staff and those qualified to do so.

Off site visits including residential and sporting activities

- To help plan for children with medical conditions to be included in off site visits the appropriate risk assessment in line with HSE guidance on school trips must be completed. Consultations may be needed with parents and health professionals if the requirements differ from their day-to-day needs stated in their Individual Health Care Plan.
- Clear but flexible arrangements must be made for children with medical conditions, for them to be included on off site visits according to their own abilities and reasonable adjustments made. Evidence from a G.P. or other clinician will be needed if a child is unable to participate.

Exceptional circumstances

- Residential school trips – Non-prescription medication. Only Paracetamol / Ibuprofen and travel sickness medication will be administered, when required, if all correct guidance has been met.
- Off site visits that include transport – Only non-prescription travel sickness medication will be administered, when required, if all correct guidance has been met.
- Other medications may be administered in accordance with this policy, authorised individually by the Head Teacher prior to attendance, on a case-by-case basis.

To avoid unacceptable practice

School staff should use their own discretion for individual cases referring to a child's IHCP.

The following practice is generally not acceptable at Clarity Independent School:

- Preventing children from easily accessing their inhalers and medication and administering their medication when and where necessary
- Assuming that every child with the same condition requires the same treatment
- Ignoring the views of children and /or their parents/carers or ignoring medical evidence or opinion
- Sending children home frequently or preventing them from taking part in activities in school
- Sending the child to the medical room or office alone or with an unsuitable escort if they become ill
- Penalising children with medical conditions for their attendance record where the absence relates to their condition, e.g. hospital appointments
- Making parents/carers feel obliged or forcing parents to attend school to administer medication or provide medical support, including toileting issues

- Creating barriers to children participating in school life, including off site visits
- Prevent children from drinking, eating or taking toilet breaks whenever they need in order to support a medical condition effectively

Insurance

Staff that undertake the responsibilities within this policy will be assured by the Headteacher that they are covered by the school's insurance.

Children with health needs who cannot attend school

If a child is unable to attend school due to health needs i.e. broken limbs, anxiety, ongoing health issues, the parents/carers must provide medical evidence to the school. Regular contact will be maintained with the family by way of home visits, multi- agency meetings and phone calls. The onus remains with the parents/carers to keep the school updated about the child's medical condition, provide evidence and an estimated return to school date regularly. The Headteacher will work with the parents/carers and external agencies to establish a long-term education plan for the child.

Complaints

All complaints should be raised with the health coordinator school in the first instance. Details on how to escalate the complaint or make a formal complaint can be found in the school complaints policy.

Administration of **Prescribed** Medication Consent Form

Childs Name: _____ Class: _____

Date of Birth: _____
